CSS small

Defines the properties for a block of text one font size smaller than the base font. **Browser**

/User Agent Support

IE	Netscape	Mozilla	Opera	Sa
2.0+	2.0+	1.0+	4.0+	

Example

This example sets the font for "small" text to a fixed size of 8pt:

```
small {  
font-size: 8pt;  
}
```

Remarks

By default, "small" sets the size of a font to one size smaller relative to the parent element.
