CSS textarea

Defines the properties for a textarea input field on a form. **Browser/User Agent**

Support

IE	Netscape	Mozilla	Opera	Sa
2.0+	1.0+	1.0+	4.0+	

Example

This example adds a border and padding around all textarea elements:

```
textarea {  
border-color: black;  
border-style: solid;  
border-width: thin;  
padding: 3px;  
}
```

Remarks

You will usually use classes and id's to style individual textarea elements, rather than styling all textarea elements at once.
